

ATRAX
Weighing and Dimensioning Specialists

Trusted in over 100 countries

WORLD LEADERS IN WEIGHING AND DIMENSIONING

ATRAX Group is the world leader in the design, manufacture, integration and support of a full range of industrial weighing, measurement and related control systems for the Airport and Logistics industries.

Established over a quarter of a century ago, we have become truly worldwide specialists in our chosen niche areas of airport baggage, cargo and express parcel.

Today, our products and systems are installed and utilised in over 800 airport projects across more than 100 countries.

Our unrivalled quality and capabilities mean that we can be trusted to provide you with fast and accurate measuring equipment that meet technical specifications, Government regulations and industry standards around the world. This guarantees compliance, revenue protection and safety for your operations.

THE MOST ADVANCED RANGE OF PRODUCTS AND SERVICES

We are renowned for reliable and accurate measurement (which protects revenue), safe and efficient loading, products designed for easy maintenance, and extensive global support. Our collaborative partnership approach ensures on time and successful project outcomes.

We are renowned for reliable and accurate measurement, which protects revenue, as well as products that are designed for easy maintenance, and our extensive global support.

Our products are rigorously tested, proven in all markets and approved by regulatory bodies all around the world - yet they are cost-effective.

Our collaborative partnership approach ensures on time and successful project outcomes. Because we design specifically for the sectors we serve and then manufacture our products in volume, you will benefit from both our production scale and the specialisation we offer.

In addition, our suite of products and services is backed by our innovative engineering and Research and Development capabilities, entirely geared to solving your challenges. Every challenge and test just makes our products better.

Weighing

- Baggage scales
- Oversize baggage scales
- Passenger self-check scales
- Cabin bag measuring units
- Dynamic scales (in-motion)
- Load indicators
- Cargo scales
- Drive-over scales
- Platform scales
- Digital weight indicators

Volumetric Scanning

- Loose cargo volume measurement
- Bulk cargo volume measurement
- Parcel size and volume measurement
- Dimensioning on moving conveyors

Digital Displays

- Large figure scale displays
- Outdoor/indoor displays
- Variable message displays
- Alpha-numeric displays
- Networked displays
- Digital signage

Controls & Components

- Networked conveyor control modules
- Extended operator panels (check-in conveyor control)
- Full range of junction boxes, scale and conveyor wheels, adjustable feet, rollers, casters, ball transfer units and more

Providing individual components and complete solutions for the following uses:

Airport Baggage

- Baggage check-in, self-check, bag drop and group baggage weighing
- Oversized, checked and carry-on baggage weighing
- Excess baggage measurement
- Bag make-up room signage
- Overweight and balance detection
- Flight load and balance
- Plane overload prevention
- Flight information display systems
- Volumetric bag measurement - stationery and on-conveyor
- Cost-efficient conveyor control

Air Cargo

- Loose/bulk cargo weighing and dimensioning measurement
- ULD weighing
- Truck dock-level scales
- TV and ETV weighing
- Flight information display systems
- Flight load and balance
- Plane overload prevention
- Networked data collection and printing
- Fast measurement, accurate, safe and efficient loading
- Revenue accuracy

Express Parcel

- Loose/bulk cargo weighing and dimension measurement
- Dynamic on-conveyor/on-tilt tray weight and dimension measurement
- ULD weighing
- Flight information display systems, fast and efficient guidance
- Plane overload prevention
- Overweight and balance detection
- Networked data collection and printing
- Fast measurement, accurate, safe and efficient loading
- Revenue accuracy

Supported by our service and systems capabilities:

Service Support/Calibration

- Equipment - modular and configurable designs that plug together
- Well documented, easy-to-run self-diagnostics
- International network of qualified service agents available rapidly
- Calibration services
- Easy-to-use manuals show customers how to do operational calibration and maintenance checks
- Spare parts in strategic locations worldwide
- Dial-in for remote monitoring for some products

Data Management System

- Our equipment can be networked
- Some products are web-enabled, allowing remote data access
- Data can be made available on Local Area Network (LAN) or on the web
- Data inputs by keyboard, barcode, RFID and other custom solutions

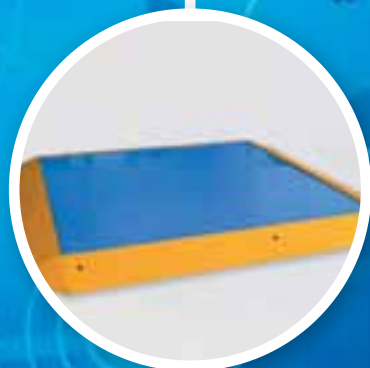

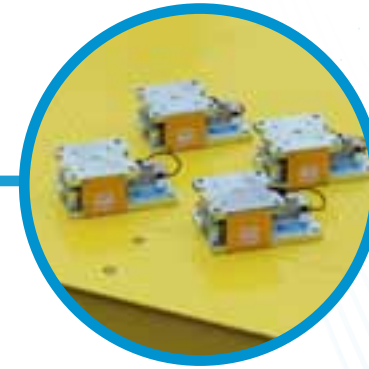

ACTIVE AND COST-EFFECTIVE WORLDWIDE

At ATRAX, we take pride in being internationally competitive and responsive, focusing our skills and efforts entirely on our specialist field. We are not a multi-divisional corporation for whom airport logistics weighing systems are a side line: we are specialists in this niche, completely geared to finding the best and most cost-effective solutions to your challenges, wherever you are worldwide.

Our products are also engineered to be cost-effective for you through clever design that maximises performance while minimising cost. We then source globally, getting the best raw materials at optimum prices, and manufacturing our products in multiple global locations.

As ATRAX products and systems are installed and utilised in over 800 airport projects across more than 100 countries, we take pride in going further than anyone in supporting the reliability of our products through our wide network of international service agents.

ATRAX
Weighing and Dimensioning Specialists

Trusted in over 100 countries

CHOOSE ATRAX FOR

Aviation/airport speciality - we are primarily focused on product quality and innovations for this sector

Technical skill - better designs and modern, good looking products

High quality - everything we produce is manufactured to the highest quality standards. Our minimal failure rates are the result of designs that are tested daily around the world

Support - responsive, knowledgeable and easy to deal with. Our unrivalled level of support means that we stand behind our products and we will never walk away from an issue

Innovation - bringing new and relevant and new products and solutions to market to service your business specifically

Integration - incorporating functions such as networked control nodes and other materials handling control systems to meet your precise needs

Approvals from Government Weights and Measures Departments worldwide - no company has more international approvals than Atrax

Wide installed product base - trusted in over 100 countries

Cost-effective results - using our global production volumes to leverage value for you
